01 · WHO WE ARE

Senior engineers building web, mobile and AI products for businesses that need to ship.

WHO WE SERVE

Startups and growth-stage businesses

DOMAINS WE BUILD FOR

- Travel & Tourism
- Aviation
- SaaS & B2B Platforms
- Enterprise AI
- Legal & Compliance
- EdTech
- Food & Restaurants
- Media & Content

BASED IN INDIA, SERVING GLOBALLY

Headquartered in Gurugram

Delivering for clients across India, the US, the UK and the UAE.

02 · TRACK RECORD

The record so far

30+

Products shipped

100%

Client re-engagement rate

<12h

Response time SLA

03 · WHAT WE DO

Five capabilities, one team

01

Web development

Platforms, portals and dashboards on Next.js, React, NestJS and Node.js.

02

Mobile apps

Mobile apps that work hand in hand with your web product and backend.

03

Cloud & DevOps

CI/CD pipelines, server setup and automated deployments.

04

AI & automation

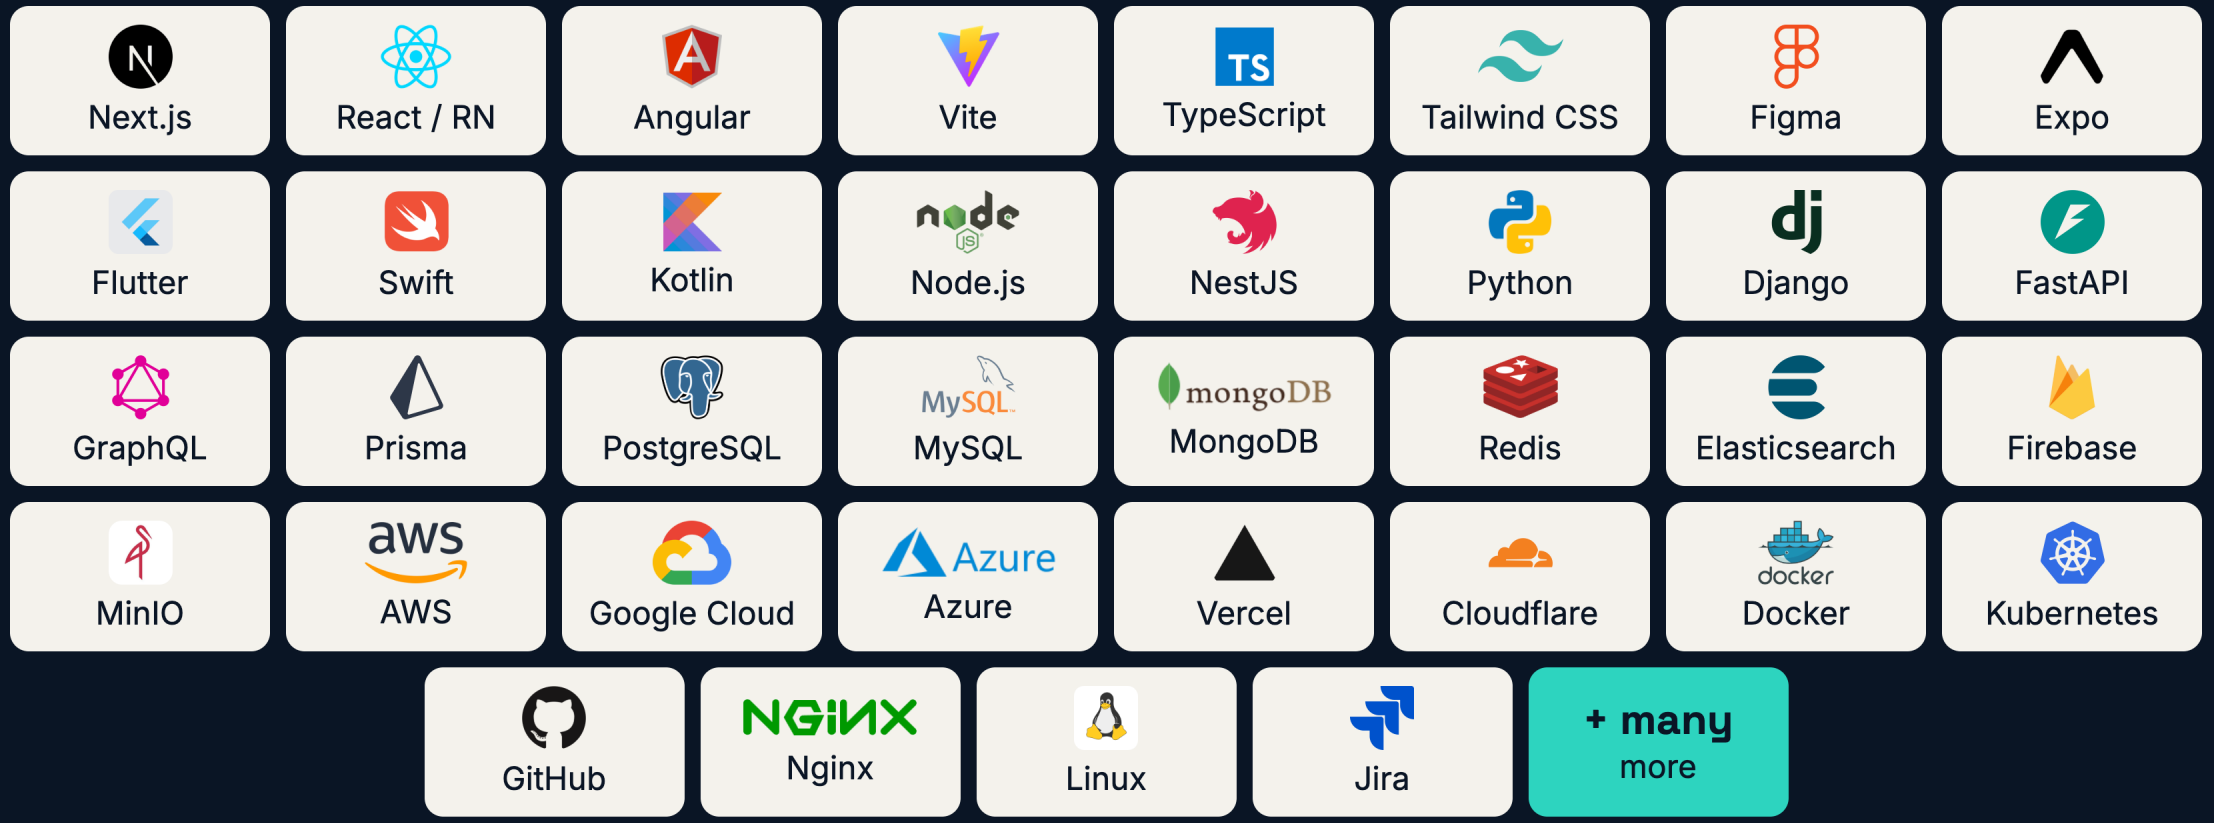

RAG chat assistants, WhatsApp bots and workflow automation.

05

UI/UX design

User flows, interfaces and design systems, signed off before code.

The stack we build with

05 · CLOUD ENGINEERING

What we handle as your cloud engineers

CI/CD pipelines

GitHub Actions with caching, path filters and deploy on merge to main.

Server setup

Linux VPS provisioning and Nginx configuration for production apps.

Domains & SSL

Domain migrations, 301 redirects and SSL certificates without lost traffic.

Managed hosting

Firebase deployments for web apps and AI tools.

Storage

Self-hosted MinIO object storage for documents and files.

Built for load

Architecture sized for hundreds of concurrent users.

Services we plug your product into

Razorpay	Stripe	PayPal	Cashfree	PayU	WooCommerce	Shopify	Shiprocket
Amadeus	TBO	Klook	GetYourGuide	Rail Europe	WhatsApp API	DoubleTick	WATI
ManyChat	Twilio	SendGrid	AWS SES	Firebase FCM	Callerdesk	Callyzer	Slack
Zendesk	CustomerLabs	Zapier	Microsoft 365	Google Cloud	Meta Suite	OpenAI	Claude
Gemini	Supabase	Keycloak	OAuth / OIDC	Algolia	Sentry	Documenso	+ many more

Why teams choose Codevibe

Senior-only engineering

Experienced engineers on every project, from architecture to launch.

Fixed-price options

Scope and cost agreed upfront, so your budget holds.

Sub-12-hour response SLA

Every message answered within 12 hours, on every project.

Clients come back

100% of our clients have returned for further work.

From brief to launch in five stages

01

Discover

We map goals, users and scope, then agree a plan and a price.

→

02

Design

Flows and interfaces signed off before any code is written.

→

03

Build

Senior engineers build in short cycles, with progress you can see.

→

04

Test

Every feature is tested and fixed before it reaches your users.

→

05

Launch

We deploy, monitor and keep improving after go-live.

09 · OUR CLIENTS

Businesses we build for

UTAZZO® Holidays

TOALT
TRIP OF A LIFETIME

reelrr

Fix Departures
An Aviation Co.

TrueFareTrip

A travel platform where WhatsApp enquiries land straight in the CRM

CLIENT

Travel company

ENGAGEMENT

Website, CRM and automation

STACK

Next.js · React · Nginx · Meta CAPI

Website platform

Public storefront on Next.js, managed from a React admin.

CRM with a production API

One place for every lead, fed by the website and bots.

WhatsApp intake bot

Trip enquiries captured on WhatsApp and posted to the CRM automatically.

Infrastructure and analytics

Domain migration with 301 redirects and SSL, plus Meta Pixel and Conversions API.

A complete digital stack for a group tour operator

CLIENT

Group tour operator

ENGAGEMENT

6.5-month build with an SEO programme

STACK

Next.js · React · NestJS · Razorpay

Public website

Next.js site with a React admin to manage tours and content.

Embedded CRM

Customer records and pipeline on a NestJS API.

Lead management system

A standalone system for group-tour leads, with WhatsApp and Razorpay built in.

12-month SEO programme

Audit and ongoing SEO running alongside the build.

An enterprise RAG assistant built for hundreds of concurrent users

CLIENT

Enterprise client

ENGAGEMENT

AI chat application

STACK

React · Firebase · NoSQL · RAG

Retrieval-augmented chat

Answers grounded in the organisation's own knowledge.

Full chat interface

Chatbot UI built in React and deployed on Firebase.

Conversation history

Every conversation stored in a NoSQL database for users to return to.

Built for scale

Designed for 200 to 300 concurrent users at minimum.

We publish the tools we build

Open-source npm packages that came out of our client work, free for any team to use.

</> ai-bot-access

Checks whether AI crawlers, search engines and link-preview bots can read a site, verifies bot IPs and reads access logs.

```
npm i ai-bot-access
```

Free tool: codevibe.in/tools/ai-bot-access

</> next-deferred-tags

Loads Google Tag Manager, GA4, Meta Pixel and LinkedIn Insight in Next.js after the page is interactive, with Consent Mode v2 and a cookie banner.

```
npm i next-deferred-tags
```

Free tool: codevibe.in/tools/next-deferred-tags

12 · HOSTING PARTNER

An official Hostinger Partner agency

Hostinger approved Codevibe as a Partner agency in November 2026. Build and hosting now come from one team.

HOSTINGER Partner

Code CODEVIBE20 · 20% off

Hosting set up for you

We pick the right plan for each build, then set it up and look after it.

20% off for our clients

Use code CODEVIBE20 or our partner link on a new Hostinger plan for 20% off the first term.

We run on it too

codevibe.in is hosted on Hostinger Cloud, deployed straight from GitHub.

Let's build what's next.
